THE ADVANCE INFRATECH

THE ADVANCE INFRATECH

INTRODUCTION

The Advance Infratech is a highly professional firm of Architects and Engineers. In addition to managing and designing, The Advance Infratech also offers Mechanical, Electrical, Sanitary, Structural Engineering, and Quantity Surveying through professional teams of associate consultants. Therefore, we are capable of serving a wide range of clients and providing comprehensive design and construction services for civil and interior work. We have experience in projects such as residential, industrial, commercial, and institutional buildings, and we have the capability to handle any type of interior work.

About us.

We are equipped with a fully computerized studio as our basic working tool. Using a digital platform has improved the response time through online communication with the client. As a result, customers can discuss their queries and get solutions much faster through online communication. Using the latest technologies enables us to provide high-quality results.

Why Choose Us?

Our primary goal is to complete a project on "Time" and within "Budget" while ensuring the highest level of "Quality". The design and construction phases are continuously monitored to ensure that corrective actions are taken. The firm is involved in every stage of the project. This includes defining the program requirements, developing the design, awarding orders & contracts, managing the construction, and handing over the site. With this commitment, based on trust and quality work, we build a long-term relationship with our clients..
